The analytic validation of FoundationOne®, based on a prior version of the FoundationOne® assay (236 genes, 19 select rearrangements), was published in *Nature Biotechnology*⁵ and established the performance specifications required to deliver the high level of accuracy routinely obtained by FoundationOne® for major classes of genomic alteration. This updated version of FoundationOne® met these performance specifications by demonstrating high concordance with genomic profiles of 94 clinical specimens previously profiled on the validated version of FoundationOne®.
